
THE IMPORTANCE OF READING AND SPEAKING SKILLS IN LANGUAGE LEARNING

Gulhayat Abdullayeva

Azerbaijan State Pedagogical University

1. Introduction

“Where there is little reading there will be little language learning. ... A student who wants to learn English will have to read himself into a knowledge of it unless he can move into an English environment” (Bright and McGregor, 1970, p.52).

Everybody knows that language acquisition without reading is difficult. Reading is a good way of comprehension. A good reader is able to understand sentences and structures of a written text. Bright and McGregor confirm that reading is ‘the most pleasant route to command of the language’, because it is via reading ‘the student is most likely to find words used memorably with force and point.’ (1970, p.53).

It is clear that reading is a key factor in language learning. One important notion of developing reading skills and speaking skills is to use the language for learning as well as communication. Reading plays a big part in successful language learning. It can develop speaking skills. It needs to note that speaking holds a very significant place in foreign language learning because through speech messages passed. According to Ur (1996, p.120), “of all the four skills (listening, speaking, reading and writing), speaking seems intuitively the most important”. Reading outside the classroom is the most significant influence on oral communication ability. Students who read a lot are more likely to speak well. Students through reading develop in both fluency and accuracy of expression in their speaking. Davies and Pearse (2000) stresses the importance of communication as: “Real success in English teaching and learning is when the learners can actually communicate in English inside and outside the classroom.” In addition, success in studying a language often measured by learners’ ability to speak in the language being learned.

2. Speaking

Language is a tool for communication. We communicate with others to express our ideas, and to know others’ ideas as well. Communication takes place, where there is speech. Without speech, we cannot communicate with one another. The importance of

speaking skills, hence, is enormous for the learners of any language. Without speech, a language reduced to a mere script. We use a language in a variety of situations.

Speaking is being capable of speech, expressing or exchanging thoughts through using language. "Speaking is a productive aural or oral skill and it consists of producing systematic verbal utterances to convey meaning (Nunan, 2003, p.48)." Harmer(2001) notes down that from the communicative point of view, speaking has many different aspects including two major categories –

a) Accuracy, involving the correct use of vocabulary, grammar and pronunciation practiced through controlled and guided activities;

b) Fluency, considered to be 'the ability to keep going when speaking spontaneously'.

Bygate (1991, p.3), also emphasizes knowledge of the language, and skill in using this knowledge for an effective communication. Language knowledge and skill in using it considered two fundamental elements of an effective communication. Among the elements necessary for spoken production, are the following (Harmer, 2001, p.269):

- Connected Speech: effective learners of English need to be able not only to produce the individual phonemes of English as in saying (I would have gone) but also to use fluent 'connected speech' as in (I'd/ 've gone). In connected speech, sounds are modified, omitted, added or weakened.

Expressive Devices: native speakers of English change the pitch and stress of particular parts of utterances, vary volume and speed, and show by other physical and non-verbal means how they are feeling.

- Lexis and Grammar: spontaneous speech is, marked by the use of number of common lexical phrases, especially in the performance of certain language functions.
- Negotiation and language: effective speaking benefits from the negotiation and language we use to seek clarification and to show the structure of what we are saying. This study highlights vocabulary and grammar knowledge among these elements. Reading will enable learners to develop their vocabulary and grammar knowledge, which will effectively contribute to their speaking skills. Vocabulary and grammar knowledge will enable learners to understand so reading will increase learners' understanding, capability, which they need for a better communication.

The ability to use the language as a means of communication often judges one's successfulness in speaking class in language learning. This success is detected when a language learner can use the language to express his ideas, feeling, and thought in the form of monologue or dialogue or the success can be simply seen when language learners are able to express their purposes or when language learners are able to make a conversation with others.

The improvement in the speaking skill is seen in the individual student active participation in explaining or describing the chosen topic, the ability to play the assigned role in the classroom meeting and presentation, the ability to ask questions, the ability to answer or respond questions, and the ability to comment and argue during the discussion.

3. Reading

Reading is beyond the mere recognition of words at a glance or of decoding the meaning of letters or words strewn together. It is a conscious and unconscious thinking process, whereby the reader applies various strategies to infer the intended meaning of the writer.

Reading is one of the most effective ways of foreign language learning and it is simply the interpretation of a written message. Walter R. Hill (1979, p.4) briefly defines reading as what the reader does to get the meaning he needs from contextual resources. Reading is a fluent process of readers combining information from a text and their own background knowledge to build meaning and the goal of reading is comprehension (Nunan, 2003, p.68). The ability to read requires that the reader draw information from a text and combine it with information and expectations that the reader already has (Grabe, Stoller, 2001, p.187). Alderson J.C. (2000) states that reading is built from two components: word recognition and comprehension.

These two components gained through reading will foster learners' language competence. Krashen and Terrell (1989, p.131) point out that reading enables learners to comprehend better which is an important factor that can develop language competence.

Definition of reading (David Nunan), *Practical English Language Teaching*. (2003. p. 72) Hedge (2003) writes the goals of learners' in a reading process as:

- The ability to read a wide range of texts in English.
- Building a knowledge of language which will facilitate reading ability
- Building schematic knowledge
- The ability to adapt the reading style according to reading purpose (skimming, scanning)
- Developing an awareness of the structure of written texts in English
- Taking a critical stance to the contexts of the texts. Reading will add to learners' conversational performance.

Reading will help learners to decipher new words that they need for conversations. Through reading, language learners will have vocabulary knowledge, which will

facilitate their speaking performance and their usage of structure in the target language will develop. These components, which are required through reading, are all necessary for developing speaking skills.

Similarly, Williams (1984, p.13) suggests some reasons why language learners should read in a foreign language:

- Learners can have further practice in the language that they have learnt,
- Learners can practice language in order to reuse it in other skills such as speaking and writing,
- Learners can learn how to get benefit from the texts to extract the information they need,
- Learners can find enjoyment or interest through reading.

4. Integrating Reading and Speaking Skills

In a reading process, six component skills are suggested: among these knowledge fields, vocabulary and structural knowledge, which are acquired through reading, influence learners' speaking achievement.

- 1) Automatic recognition skills
- 2) Vocabulary and structural knowledge
- 3) Formal discourse structure knowledge
- 4) Content/world background knowledge
- 5) Synthesis and evaluation skills/strategies
- 6) Metacognitive knowledge and skills monitoring (Grabe,1991, p.379).

Let us analyze how these component skills contribute to speaking skills. Anne Lazaraton (2001, p.104) suggests that oral communication based on four dimensions or competences:

- 1- grammatical competence (phonology, vocabulary, word and sentence formation ...);
- 2- socio-linguistic competence (rules for interaction, social meanings);
- 3- discourse competence (cohesion and how sentences are linked together);
- 4- strategic competence (compensatory strategies to use in difficult strategies).

As we know, vocabulary knowledge and grammar are two essential factors of foreign language learning, and they both influence learner's speaking performance. Good knowledge of grammar is viewed as an essential aspect for achievement in a foreign language. Grammar is important to learn the nature of language. Grammar helps learners to build comprehensible sentences in speaking. In order to understand

how language works, learners should give attention to grammar. “If we only understand what others say partially and superficially, the communication of ideas can’t be properly realized (Zhong-guo, Min-yan, 2007, p.63).”

English language learners need to learn to think in English to be able effectively read this language. Some reading skills like previewing and predicting the outcome of a text, questioning the intentions of the author or identifying relationships between ideas need to be taught to the learners. While teaching them these reading skills, the teacher should ideally focus on one skill at a time.

For language learners reading will help acquire vocabulary and grammar. Through reading, language learners see how words fit together. When learners constantly engage in the target language, they begin noticing and mastering the patterns in the language. Mccarthy (2000) states that lexical and grammatical knowledge significantly correlated to reading comprehension. This means learners will achieve better reading comprehension through grammar. Krashen (cited in Hill and Holden, 1990, p.92) encourages reading because it is a great factor in foreign language improvement and believes that students who read a lot are good at reading, good at writing and have a good vocabulary and grammar knowledge. Learners see structure of a sentence and this enables them to build their own sentences and utterances. Reading may contribute significantly to competence in a second language. There is a good reason in fact, to hypothesize that reading makes a contribution to overall competence, to all four skills (Krashen&Terrel, 1983, p.131).

Vocabulary knowledge is indispensable for effective communication. Lewis (1993, p.23) writes that learning vocabulary is the core task in second language learning and any language skills of listening, speaking, reading, writing, and translating cannot exist without vocabulary. Vocabulary is, understanding the meaning of a word, so communication does not occur if there are no words. Therefore, reading is probably the best way to learn new words. Reading results in incidental vocabulary acquisition (Lechmann, 2007). Nation supports this idea and says: “Reading has long been seen as a major source of vocabulary growth” (Nation, 1995, p.7). Most people recognize the important relationship between knowing words and reading well. Eskey, supporting this notion, states that “the relationship between reading and vocabulary is well documented and reciprocal” (Eskey, 2005, p.567) and, “in fact the relationship between vocabulary knowledge and reading comprehension is well established in the reading literature” (Dole, Sloan, Trathen, 1995, p.452). Hedge (1985, p.77) also states that through extensive reading learners advance their ability to of guessing the meanings of unknown words and phrases from clues in the context and he concludes that students who read a lot outside the classroom may increase both their comprehending the context and improving their vocabulary which are essential elements to advance speaking skills. A broad and deep vocabulary knowledge makes learners precise and articulate. Through reading, learners see how the new words connect to other words.

“The more reading you will do, the more you will increase your exposure to vocabulary that doesn’t usually make its way into the spoken language” (Cunningham, 1998). An improved vocabulary will help learners develop their speaking skills. Speech, without vocabulary, cannot be produced. Vocabulary is one of the essential and fundamental components of communication (Levelt, 1993). And Laufer (1997) stresses the importance of vocabulary knowledge and adds that without words to express a wider range of meaning, communication in a second language cannot happen in a meaningful way. Learners will improve their speaking competence if they have better vocabulary knowledge, which they can get through reading. Sanacore (1994, p.604), is of the opinion that encouraging learners to read will lead them guessing the meanings of words, phrases from the context, and the more they read the more they will understand the meanings of sentences and concepts. And an ongoing reading habit will enable learners understand a text easily, even they do not know meanings of some words in the text. Reading extensively will enhance their comprehension. Learners will easily comprehend in the foreign language if they advance their ability of guessing the meanings of words from context, which will promote their speaking performance.

Dubin and Olshtain (1977, p.97) also point out that through extensive reading learners learn much vocabulary. They emphasize the benefits of extensive reading as:

- Students develop an ability to gain pleasure and satisfaction from reading on their own in the language they are learning.
- They are exposed to the language in a more natural and less structured way. In other words, they get a different unpressured feeling on the structure of the language since they read for pleasure, and not for a grade or a test.
- Extensive reading has also an effect on other language skills such as writing and speaking.
- Extensive reading, or reading for pleasure, will help the students comprehend more and continue to use the language after the instruction.

According to Oya, Manalo, and Greenwood, better vocabulary knowledge produces better oral performance (2009, p.11). Accuracy and fluency of learners will get better through reading. They also claim that having good vocabulary knowledge is one of the essential components to gain fluency in speaking performance (Oya, Manalo, Greenwood, 2009, p.19). It needs to be noted that good vocabulary knowledge will give learners confidence in their speaking performance. Better vocabulary knowledge and having more words at one’s disposal is likely to facilitate the ability to tell a story better, to demonstrate a more extensive range of language resources, and to come across more intelligibly. Better vocabulary knowledge could also contribute to boosting the speaker’s confidence, which would come across when speaking and influence the overall impression created. (Oya, Manalo, Greenwood, 2009, p.19) In the theoretical model of L1 and L2 speaking (Levelt, 1989, 1993), vocabulary has a central position in forming an utterance with appropriate meanings and with syntactic, morphological, and phonological structures. Levelt’s model suggests two points:

First, vocabulary is always required in the formulation stage. In other words, no speech can be produced without vocabulary, and vocabulary is indispensable to speaking performance.

Second, the lexicon consisting of lemmas and lexemes includes not only vocabulary size (i.e., primary meaning and form [phonology]) but also depth (i.e., syntax and morphology), which suggests that both size and depth are related to speaking performance (adapted from Rie Koizumi, 2005, p.53). The study by Adams (1980) and Higgs and Clifford (1982) indicates close relationships between vocabulary as part of overall speaking performance and overall speaking performance at low levels than at intermediate and advance levels (adapted from Koizumi, 2005, p.53).

Good readers can understand the individual sentences and the organizational structure of a piece of writing. They can comprehend ideas, follow arguments, and detect implications. Students have the opportunity to recognize words and expressions that they already know or have learned in class, and to learn new vocabulary by taking note of unfamiliar words and using a dictionary to find their meaning.

For language learners the best reading materials are dramas, plays and dialogues. Learners have the opportunity to find sentences and phrases used in our daily conversation in dramas, plays and dialogues because they all based on one person talking to another. Some studies have shown that using authentic texts has a positive effect on learning the target language by developing communicative competence (Peacock, 1997). “A text is usually regarded as authentic if it is not written for teaching purposes but for a real-life communicative purpose, where the writer has a certain message to pass on to the reader. As such, an authentic text is one that possesses an intrinsically communicative quality” (Lee, 1995). It is real language created by native speakers of the target language in pursuit of communicative outcomes (Little, Devitt, & Singleton, 1989). Integrating speaking and reading skills deepens students’ understanding of the reading material, reveals any problem they have understanding a text, and, most importantly, lets them apply the information they have read into authentic speaking practice that improves their fluency (Zhang, 2009, p.34).

5. Conclusion

Communication without vocabulary will break down. One of the most useful ways to improve your communication skills is extensive reading. Extensive reading will help you to develop your ability to express ideas, whilst also enlarging the size of vocabulary. Vocabulary knowledge is one of the crucial factors that will influence fluency in speaking. Reading introduces learners to a wider body of language and contexts. Reading helps learners build up better grammar skills. As learners develop stronger reading skills, they develop more sophisticated speaking skills.

Dil öyrənilməsində oxu və nitq vərdişinin önəmi

Gülhəyat Abdullayeva

Azərbaycan Dövlət Pedaqoji Universiteti

Oxu və nitq vərdişi arasında əlaqə çox böyükdür. Heç şübhə yoxdur ki, lüğət ehtiyatını zənginləşdirməklə, nitq də inkişaf etdirilir. Həqiqətən, oxu vərdişinin gücü fasiləsiz lüğət ehtiyatının təkmilləşdirilməsindən çox asılıdır ki, bu da ünsiyyəti təmin etmək üçün əsasdır. Lüğət ehtiyatının əhəmiyyəti ondan ibarətdir ki, o, nitq qabiliyyətini inkişaf etdirir və oxu vərdişinin inkişafındaən vacib mənbələrdən hesab edilir. Bununla da, oxu vərdişinin inkişafı nitq vərdişinin təkmilləşdirilməsi üçün potensial rolunu oynayır.

Açar sözlər: Oxu vərdişi, nitq vərdişi, ünsiyyət, lüğət ehtiyatı, təkmilləşdirmə

Резюме

Важность навыков чтения и говорения в изучении языка

Гюльхаят Абдуллаева

Азербайджанский Государственный Педагогический Университет

Существует большая связь между умением читать и говорить. Без сомнения, что люди, у которых сильно развит словарный запас чтения, склонны к развитию большого запаса слов устной речи. В самом деле, сила чтения зависит от продолжительного усовершенствования знания слов, которая обеспечивает общение. Важность знания слов, которая способствует умению говорить, является основным ресурсом в развитии умения говорить. Следовательно, способствуя улучшению знания слов через широкое чтение имеет потенциал для способствования усовершенствования умения говорить.

Ключевые слова: Чтение, разговор, общение, лексика, улучшение
