

SHADDADID RULER ABU`L-FATH MŪSA BIN FAZL AND HIS COINS

Mustafa SHABANOV

Ministry of Foreign Affairs of the Republic of Azerbaijan

Introduction

Ganja Emirate of Shaddadids was an Azerbaijani state that ruled in Arran in X-XI centuries respectively. A significant study on this Emirate's coinage has already been published as a book. Although the book, co-authored by Lebedev, Markov and Koyfman, has widely disclosed the coins and information about many rulers of Ganja Emirate, but no information was given about the coins of Abu'l-Fath MŪsa bin Fazl. Thus, the coins of Abu'l-Fath MŪsa bin Fazl (AH 422-425/1031-1034 AD), who ruled for a short term, remain unstudied until today. Only two of these ruler's coins have been noted on the internet resources. Significant parts of the inscriptions on coins have been erased. This article will look into these two coins, alongside the other four coins from author's private collection. It is considered that the study of these coins is going to be interesting and crucial for the scientific community. In the following paragraph, brief information is provided about the reign of Abu'l-Fath MŪsa bin Fazl.

Historical background

Historical sources provide limited information about the reign of Mūsa bin Faḏl. Only "Ta`riḫ Bāb al-Abwāb" ("History of Derbent") gives information about the reign of the ruler, which was delivered to the present day by Monajjem-bāṣi. Historical literature indicates that before Mūsa came to power, his father passed on the governance of Ganja to him. His father had chosen him as his heir, the successor to the throne. During those times, Mūsa's brother `Askuya (or `Askereveyh) was the governor of Baylaqān. In AH 421/1030 AD, `Askuya revolted against his father, so Faḏl sent his son Mūsa against `Askuya. Mūsa attacked Baylaqān with his troops, along the way recruiting troops of Russians, and suppressed the revolt, executing his brother `Askuya. It should be noted that at that time, the Russians were plundering Shirvanshah territory passing to the Kura River through the Caspian Sea. Mūsa saved his country from the danger of destruction of the invaders by directing Russians to Baylaqān in exchange for money, also managing to suppress his brother's uprising [Aṣurbəyli S.B., 2006, p. 104; Keleş N., 2006, pp. 125-126].

After reigning for 47 years, Faḏl bin Muhammad died on 10th of Zulhijja month in AH 422 (4th December 1031) [Keleş N., 2006, p. 130]. His son Musa succeeded him after his death. In AH 422/1031 AD Russians attacked the Regions along the Caspian Sea for the second time. Meanwhile, Mūsa bin Faḏl, going to Shirvanshahs for help, defeated the Russians near Baku. Russians were forced to flee the Shirvanshahs. The main reason why Mūsa helped the Shirvanshah is explained with the relative affiliation between these two dynasties. Hence, Mūsa bin Faḏl's sister, as-Sitt, was Manučehr Shirvanshah's wife. In AH 425/1034 AD, Abu'l-Hasan `Alī bin Mūsa al-Laškari (AH 425-441/1034-1049 AD) came to power killing his father Mūsa bin Faḏl. The coins struck in Ganja (written as "Janza") by Mūsa bin Faḏl, who ruled for only three years are considered to be quite rare. The inscriptions on the billon (silver-copper alloy) dirhams are written in Arabic with Kufic script.

Studying of coins

On the coins studied, the names of `Abbasid caliphs' al-Qadir (AH 381-422/991-1031 AD) and al-Qa'im (AH 422-467/1031-1075 AD) [Album S., 2013, p. 58] are encountered. The titles and laqābs such as الامر "al-amīr", الاسيد "al-sayyid", المنصور "al-mansūr", which we usually see on the coins of Faḏl bin Muhammad (AH 375-422/985-1031 AD), are found on his son Mūsa bin Faḏl's coins as well. It should be emphasized that among the titles of Mūsa bin Faḏl, الفواد "al-fouad" is mentioned too. This title is found only on the coins of Mūsa bin Faḏl coins among the Shaddadid rulers. This word means "heart and cognition" in Arabic, which has been taken from "Surah an-Najm, Verse 11" in the Qur`ān.

Photos of the coins studied have been obtained from a few sources. Images of only two of them (coins No.4 and No.5) have been published on internet without research [Zeno, No.135719 and No.135695]. The photo of the coin No.4 has been included in another literature too [Keleş N., 2006, No.3]. Two of the coins (coins No.2 and No.3) from the hoard of about 1000 pieces (possibly even more) have been found damaged and broken into pieces. The coins of Shirvanshah `Alī bin Yazīd and a few Shaddadid rulers are observed in the mentioned hoards. Only two of Mūsa bin Fażl's coins have been found in the damaged part of the hoard. Coin No.6 has probably been in the same hoard, but the undamaged coins of the hoard have been selected and included to personal collection by its first owner. It could not be clarified whether there were other rulers' coins among the ones found. The photo of coin No.1 has been discovered in a completely different place. According to the information obtained, this coin has been found in a small hoard. Only one coin of Mūsa bin Fażl has been recorded in that hoard. Other coins were consisted of billon dirham, which were struck by Fażl bin Muhammad in cities of Barda `a and Janza (Ganja). There is no information about where, when and by whom the mentioned hoards were discovered. Unfortunately, these hoards have been sold on the black market and most of them exported from the country and were included into various personal collections without scientific research being made.¹

The studied coins can be classified into three types [See the scheme on general characteristics of Mūsa bin Fażl's coins studied].

Type A

It includes two coins [See coin No.1 and No.2]. The weights of the coins are 4.22 g and 2.20 g; and the sizes are 18.2 mm and 19.5 × 12.2 mm respectively. Coin No.2 has been split into two, and only one part of it has reached our days. Both coins have been struck with different obverse and reverse dies. The feature, which distinguishes these coins from others, is that they have been struck with Caliph al-Qadir. It is not known exactly when these coins have been struck. This is due to the fact that the dates on the coins have been erased, so the dates can only be assumed.

Interesting fact is that, al-Qadir, the caliph of the `Abbasid who is mentioned on these coins, has died five days before the death of Fażl bin Muhammad, on 5 zulhijjah AH 422 (29 November 1031). Nevertheless, the name of caliph al-Qadir is mentioned on Mūsa bin Fażl's coins instead of the name of the new caliph. Indeed, sometimes it could take several months for the news of caliph's death to reach Arrān. Therefore, the coins mentioned in this article are considered to have been struck at least close to the date after caliph al-Qadir's death. This date may even be AH 422/1031 AD, the julūs date of Mūsa bin Fażl. A similar situation has

¹ We have managed to buy only the examples presented.

also happened during the reign of Faḏl bin Muhammad. Hence, five years after caliph at-Ta`i's death (AH 363-381/974-991 AD) his name was encountered on some of Faḏl bin Muhammad's coins [Lebedev V.P. and all, 2006, p.19]. This encounter was only on Faḏl bin Muhammad's first coins. This happened due to the news about caliphate change spreading late or due to the weak relationship between the regions. The situation in Mūsa bin Faḏl's coins is different. It is believed that the news of caliph's change reached Arrān more quickly in that period. At that time, Shaddadids were in their development stage; therefore it is believed that the relations with distant provinces were regular.

It should be noted that, the titles الفواد المنصور "*al-fouad*", "*al-mansūr*" encountered on coins mentioning the caliph al-Qadir, have also been used on the coins struck with the name of caliph al-Qa'im. It is noteworthy that the coins bearing the name of caliph al-Qa'im do not always bear the mentioned titles. Based on the existing information, it can be concluded that these titles are probably used only in julūs (or the first period) coinage, because of all coins minted with the name of caliph al-Qadir bear these titles. Then reverse dies of the coins bearing the name of caliph al-Qadir have been also used simultaneously in the coins bearing the name of caliph al-Qa'im too (it has been concluded so because the coins, which do not have the titles الفواد المنصور "*al-fouad*", "*al-mansūr*" have not been found, but bear the name of caliph al-Qadir). The caliph's death coincides with Faḏl's death. It is presumed that these coins have been struck in AH 422 or 423 (1031 or 1032 AD), because both of dates coincide with the 12th months of both calendars (Hijri and Gregorian).

It should be noted that mint place around central and outer circles and date, as well as verses of holy Qur`ān have been written out along with the linear inscriptions in the center of the coins. However, in the examined examples, these inscriptions are nearly erased. The word جنزه "*Janza*" (i.e. ancient writing form of the word "Ganja") is come across on both coins (around central circle of obverse and in the direction anticlockwise) studied. Inscriptions on the coins and their arrangement are as follows [See Figure 1]:

Figure 1.

Type B

It includes 2 coins [see Coin No.3 and No.4]. Weight of the coin No.3 is 0.53 g, and its sizes are 12.4×10.0 mm. This coin is broken and only part of it has reached our days. Although the weight of the coin No.4 is unknown to us, we know that its size is 20.0 mm. Both coins have been struck with different obverse and reverse dies. The distinctive feature of these coins is that they are featuring the name of caliph al-Qa'im on obverse, and the titles الفواد المنصور "*al-fouad*", "*al-mansūr*" on reverse. The dates on coins are not visible. It is believed that these coins have been struck following striking of type A coins. Inscriptions on the coins and their arrangement are as follows [See Figure 2]:

Figure 2.

Type C

It includes 2 coins [see Coin No.5 and No.6]. The weight and sizes of the coin No.5 are unknown. Weight of the coin No.6 is 4.82 g and its size is 20.4 mm. Both coins have been struck with the same obverse and reverse dies. And, their obverse die is the same of the die of Coin No.3. It can be supposed that types B and C have been struck at the same time. The distinctive feature of these coins is the absence of the titles الفواد المنصور "*al-fouad*", "*al-mansūr*" on reverse. The dates on the coins are not visible. Inscriptions on the coins and their arrangement are as follows [See Figure 3]:

Figure 3.

One of the points that is worth emphasizing is "eunwan"s (titles), "laqāb"s (cognomens/nicknames) and "kunyah"s (tekononyms) of Abu'l-Fath Mūsa bin Faḏl.² Mūsa bin Faḏl used the titles الامر "al-amīr" and السيد "al-sayyid" on his coins. These titles have been previously used by his father Faḏl bin Muhammad as well [*ibid.* p. 71]. Both titles are interrelated. So, the meaning of the word "amīr" is the person who gives orders and commands. In Shaddadids this title was given to the person who led the Emirate. The translation of the word "sayyid" from Arabic means "mister" [Būnyadov Z.M., 2007, p. 239]. Both of the above words were honorable titles given to the descendants of the Prophet Muhammad (PBUH). Even the descendants of Husayn, the grandson of the Prophet Muhammad (PBUH), are called "sayyid's", and those who descend from Hasan, who was also the grandson of the Prophet Muhammad (PBUH), are called "sharif"s (honorable). Interestingly, the only paternal descendants of the Prophet Muhammad (PBUH) and those who accepted Islam are considered as sayyid and sharif. Thus, these titles are not assigned to people for their position and image in the society. The word "amīr" is currently being used as "mir" at the beginning of the name of the people, who are the descendent of this sacred generation. This tradition has been accepted in almost the entire Islamic world. Therefore, it can be stated that Faḏl bin Muhammad and Mūsa bin Faḏl were descendants of the Prophet Muhammad (PBUH), because both have used these titles, and like all the prophets, they are also from the hanīf tribe of Ibrahim (PBUH). It should be noted that the Prophet Muhammad (PBUH) has had no relation whatsoever with the Kurds. Consequently, it is not true to recognize Shaddadids as a Kurdish dynasty. There is no reliable information on the origin and identity of Kurtak³ (so called founder of the dynasty) in historical sources [Keleş N., 2006, p. 83]. Even though in the "Ta`rikh Bāb al-Abwāb" it is noted that Shaddadids was Kurdish origin, Ebn al-Athir draws attention to their connection with Rawwadids as well [*ibid.* p. 84]. It is known that founders of the Rawwadids were Arabs. It should be taken into account that ongoing new studies should be delineated alienating the standardly accepted Kurdish descendance and evidencing connection with the Arabic roots.

Conclusion

Mūsa bin Faḏl has used two different laqābs on his coins. As mentioned above, these *laqābs* are الفواد "al-fouad" (cognition by heart) and المنصور "al-mansūr" (victorious). Among them المنصور "al-mansūr" was the sole *laqāb* of his father Faḏl bin Muhammad [Lebedev V.P. and all, 2006, p. 71].

Mūsa bin Faḏl's kunyah "abu`l-fath" (father of the conqueror) has not been encountered on his coins, however it has been included in literature on the history

² For further information on the definitions see *Album S.*, 2013. pp. 11-12.

³ Probably, the identification is reckoned this word.

of Shaddadids [Keleş N., 2006, p.131]. Nevertheless, Mūsa used the kunyah بن الفضل "*bin Fażl*" (son of Fażl) on all of his coins.

Interestingly, the "nisba" (attribution) "*šaddādi*", previously encountered on Fażl bin Muhammad's coins, has not been used by Mūsa bin Fażl.

As a result, it is thought that this study will contribute to further researches by both ours and other researchers. It is assumed that Mūsa bin Fażl's coin types will be included to the scientific literature as well. Besides, hopefully new titles and laqābs of Mūsa bin Fażl, which featured on coins, will be important source for historians as well.

List of abbreviations:

AD –	Latin: <i>Anno Domini</i> (in the year of the Lord), Gregorian calendar
AH –	Latin: <i>Anno Hegirae</i> (in the year of the Hijra), Islamic calendar
g –	The gram
Ibid. –	Latin: <i>Ibidem</i> (in the same place)
i.e. –	Latin: <i>id est</i> (that is)
mm –	The millimeter
PBUH –	Peace be upon him
p./pp. –	Page(s)

Şəddadi hökmdarı Əbul-Fəth Musa bin Fəzl və onun sikkələri

Mustafa Şabanov
Azərbaycan Respublikası Xarici İşlər Nazirliyi

Məqalədə Şəddadi hökmdarlarından Əbü'l-Fəth Musa bin Fəzlin bu günə qədər bilinməyən sikkələri tədqiq edilmişdir. Müəllif tədqiq olunan sikkələri tiplərə bölərək, hər bir tipin xarakterik xüsusiyyətlərini ayrıca izah etmişdir. Məqalədə kürd əsilli olduğu bilinən Şəddadilərin sikkələr üzərindəki yazılara əsaslanaraq, kürd deyil, ərəb əsilli olduqlarına dair faktlar da ilk dəfə işıqlandırılır. Məqalə tədqiq olunan sikkələrin şəkilləri, tiplərin ayrı-ayrı vizual təsvirləri, həmçinin sikkələr arasında qarşılıqlı əlaqə və bağlılığı göstərən əyani sxemlə zənginləşdirilmişdir.

Açar sözlər: Şəddadilər, Musa bin Fəzl, Əl-Qadir, Əl-Qaim, sikkə, vizual təsvir.

РЕЗЮМЕ

Правитель Шаддадидов Абуль-Фата бин Фазл и его монеты

Мустафа Шабанов

Министерство Иностранных Дел Азербайджанской Республики

В настоящей статье были исследованы неизвестные до наших дней монеты, произведенные в период правления одного из правителей государства Шаддадидов Абуль-Фата бин Фазла. Автор разделяет монеты по типам, отдельно описывая характеристики каждого из них. Основываясь на надписях монет, впервые были приведены факты, доказывающие не курдское, а арабское происхождение династии Шаддадидов. Статья обогащена фотографиями монет и наглядными иллюстрациями их отдельных типов, а также схемами, демонстрирующими наличие связи между ними.

Ключевые слова: Шаддадиды, Муса бин Фазл, аль-Кадир, аль-Каим, монета, визуальное описание.
